

Gate Latch Installation

Gate latch installs on the inside of the rail. (The side with the magnetic pin gets installed on the rail side)

1. Use hole template to mark all 4 holes with a marker.

2. Pre-drill all 4 holes with a 7/64" drill bit.
3. Mount gate latch using the included self-taping screws using a #2 Phillips bit.
4. Cover the screw on gate latch with included plastic covers.
